THE SCIENTIFIC ALTERNATIVE

BioVeda Health & Wellness Centers offer the latest therapies in alternative and holistic health care. Our center specializes in scientifically integrating holistic medical philosophy with modern technology providing an alternative, non-invasive and natural approach to health and wellness.

Our clinical goal is to help as many people realize improved health and relief using our revolutionary technology. Our clinic is guided by a patient before profit approach sharing common ideologies that reflect the best of what alternative and holistic healthcare represent.

THE SCIENTIFIC ALTERNATIVE

Introducing Substance Specific Neurological Stress Reduction Therapy

Neurological Stress Reduction Therapy or NSRT provides a novel and unique approach to wellness that is based on proven, accepted science, allowing patients who generally have very few if any treatment options to experience symptomatic relief. Our technology and science are based on four facts:

1) Stress causes or exacerbates most health related conditions.

“According to the American Medical Association (AMA), stress is the cause of 80-85 percent of all human illness and disease. Every week, 95 million Americans suffer some kind of stress-related symptom for which they take medication.”

2) The brain creates associations between stressful events and substances which are often times inappropriate and subsequently lead to a host of chronic and acute conditions.

3) A general reduction of stress levels can significantly decrease symptoms of many conditions.

4) If these associations can be broken, by introducing a positive stimulus in conjunction with the specific stress inducing substance... symptoms can be reduced or eliminated.

THE SCIENTIFIC ALTERNATIVE

Understanding Neurological Stress Reduction Therapy

Wellness is impacted by the body's reaction to substances in the environment and varying levels of physiological stress, not to be confused with anxiety or psychological stress, placed on the nervous system. Each person is unique and therefore every single one of us has the potential to react differently to any given substance.

Peanuts, Grass, Pollen, Perfume, Wheat, Lactose, Stinging Insects and Animal Dander are examples.

By Definition, **"Allergies are abnormal or inappropriate reactions of the nervous system that occur in response to otherwise harmless substances."** – Alternative Medicine Encyclopedia

Many substances, like environmental inhalants or pollutants are obviously going to have a negative impact on health, but often times it is very difficult, if not impossible to identify exactly which pollutant is affecting an individual especially if they are harmless to most people.

THE SCIENTIFIC ALTERNATIVE

Understanding Neurological Stress Reduction Therapy II

In the instance a normally harmless substance is triggering a symptom it may be even harder to identify because these substances aren't typically determined to be suspects.

The affects of these substances can range from mild or unnoticeable to severe and debilitating.

Through the identification or assessment of the specific substances that cause elevated physiological stress levels on the nervous system and subsequent therapy to condition the body to react normally during real world exposure, symptoms can be significantly reduced or eliminated.

Eliminate Stress Response = Elimination of Symptom Expression = Elimination of Condition

Traditional pharmaceuticals and drugs treat the symptom. NSRT identifies what triggers the symptom and eliminates that trigger before the symptom even starts. We identify what causes your symptoms rather than trying to manage the symptom.

THE SCIENTIFIC ALTERNATIVE

Neurological Stress Reduction Therapy General Conditions

Patients learning about our technology for the first time inevitably want to discuss what specific symptoms and conditions our devices treat. The traditional medical community puts a label on everything. Our doctors and our patients however aren't concerned with labels.

The answer is, our devices and technology including the BAX 3000 do not diagnose or treat any conditions. Our assessment protocols are designed to indicate which substances through exposure place physiological stress on the nervous system. These substances are determined to be either deficient in the individual, mal-absorbed or in many cases, the triggers for symptomatic expressions of numerous autoimmune related conditions.

At BioVeda Health and Wellness Centers, we focus on stress and how specific substances affect physiological stress levels. Discussing our devices and technology as a "cure" or even a treatment for any condition beyond stress reduction is something that would be misleading and something we refrain from.

THE SCIENTIFIC ALTERNATIVE

Neurological Stress Reduction Therapy General Conditions II

Ok, so if you don't treat anything, why am I here? The answer is in how reducing physiological stress specifically correlates to the symptoms and conditions afflicting you.

When stress or pressure is applied to the nervous system through exposure to specific substances, the nervous system begins to fight or expel the substance from the body. This response is referred to as an **Autonomic Nervous System Mediated Response which can be expressed by the body in the form of sinus pressure, skin irritations, headaches, upset stomach or any other manner in which the body can expel the substance it believes is harmful or toxic.**

The ANS Mediated Response is the trigger for all of these symptoms which when diagnosed as chronic by the medical community become conditions we all know such as allergy, asthma, eczema, ADD, ADHD, migraine, IBS or Chronic Fatigue Syndrome.

THE SCIENTIFIC ALTERNATIVE

Neurological Stress Reduction Therapy General Conditions III

Through NSRT, the fight or flight response by the nervous system can be reduced or eliminated. These responses are the triggers for symptoms commonly associated with:

- Allergies & Sinus Conditions
- Asthma & Respiratory Conditions
- Migraines, Headaches & Chronic Fatigue
- ADD, ADHD, Autism & Asperger's Syndrome
- Skin Irritations such as Eczema & Rosacea
- Indigestion, Constipation & Bloating
- IBS (Irritable Bowel Syndrome)
- Erectile Dysfunction
- Menstrual Irregularity

THE SCIENTIFIC ALTERNATIVE

Neurological Stress Reduction Therapy Allergies

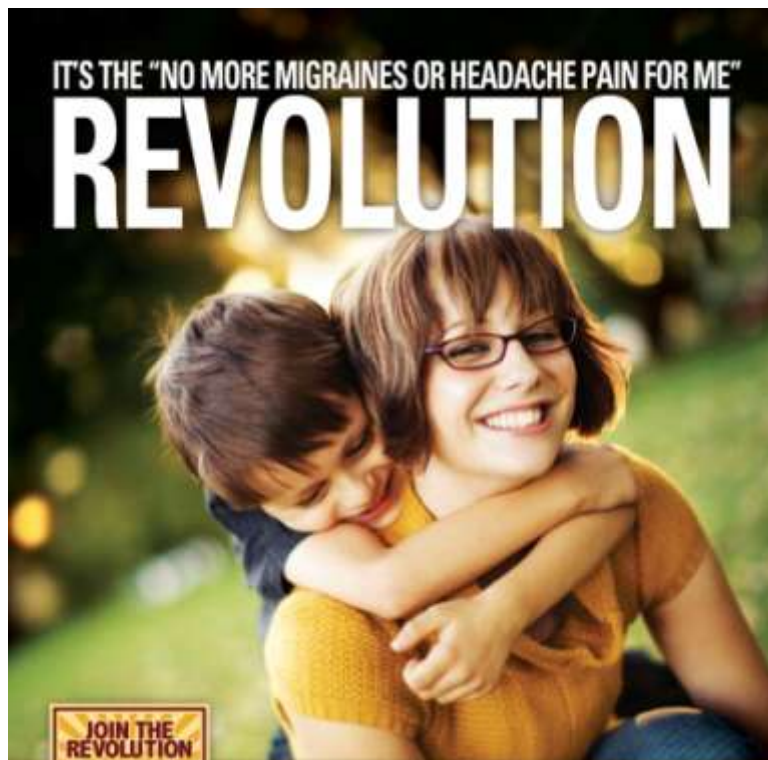

The BAX 3000 however, is not an allergy device and our assessment protocol does not indicate whether a stressor is an allergy, sensitivity or anything else beyond whether or not stress increases in a statistically significant manner.

There is however a direct correlation between stress and allergy symptoms and understanding how they are related is an important part of determining if BAX Therapy is right for you.

THE SCIENTIFIC ALTERNATIVE

Neurological Stress Reduction Therapy Allergies

Recent research shows that general stress can cause symptoms of allergic reactions to be twice as severe. Histamine production is significantly greater when an individual experiences physiological stress.

Reducing stress significantly reduces the expression of allergy symptoms. The presentation of positive stimulation via substance specific light therapy can reduce or eliminate the stress response which in many cases will eliminate the allergy symptom.

THE SCIENTIFIC ALTERNATIVE

Neurological Stress Reduction Therapy Allergy Testimonial I

“There are no words to express my gratitude to you and BAX 3000 machine for the MIRACLE that has changed my life.

For the first time in 26 years I am able to be outside when grass and leaves are being mowed. What a change from running inside to close all doors and windows and being miserable. For the first time in 32 years I have been able to travel in a plane without the use of gels, pills, creams, etc. and sometimes even the use of a mask. In the last couple of weeks I have been on a plane four times and it has been a pleasure. It is also the first time I have not ended up at the doctors office with a virus infection after having been on these plane flights.

I no longer have to take allergy pills, allergy shots or use a nose spray.

I no longer have an itchy nose or itchy eyes and ears.

I no longer suffer from sinus headaches or sinus problems.

My friends and I cannot believe the changes it has made in my life. I look and feel healthier than I have in a long time.

Because of all the allergies I had, you thought I might have a 75% improvement, but I believe its more like 90% or 95% improvement and an absolute MIRACLE. I highly recommend you and your office and the miracle machine to all of my friends and acquaintances, especially when they comment on how great I look. I make sure I tell them about my miraculous improvement. I owe you a tremendous thank you for persevering with my severe case of allergies and I thank the lord that I read about you in the Pocono Record and that you were so kind and helpful to me.”

Dr. Lawrence Kahn
P. O. Box 720
Sellers, PA 18254

Dear Dr. Kahn,

There are no words to express my gratitude to you and your Neurologing machine for the MIRACLE that has changed my life.

1. For the first time in 26 years I am able to be outside when grass and leaves are being mowed. What a change from running inside to close all doors and windows and being miserable.
2. For the first time in 32 years I have been able to travel in a plane without the use of pills, pills, creams, etc. and sometimes even the use of a mask. In the last couple of weeks I have been on a plane four times and it has been a pleasure. It is also the first time I have not ended up at the Doctors office with a virus infection after having been on these plane flights.
3. I no longer have to take allergy pills, allergy shots or use a nose spray.
4. I no longer have an itchy nose or itchy eyes and ears.
5. I no longer suffer from sinus headaches or sinus problems.

My friends and I cannot believe the changes it has made in my life. I look and feel healthier than I have in a long time.

Because of all the allergies I had, you thought I might have a 75% improvement, but I believe its more like 90% or 95% improvement and an absolute MIRACLE.

I highly recommend you and your office and the miracle machine to all my friends and acquaintances, especially when they comment on how great I look. I make sure I tell them about my miraculous improvement.

I owe you a tremendous thank you for persevering with my severe case of allergies and I thank the Lord that I read about you in the Pocono Record and that you were so kind and helpful to me.

Sincerely,
Michael Bell

"The worst is red, itchy eyes where I just want to tear my eyes out," said Pam Campbell. She's allergic to cats.

Campbell believes the laser cured her allergy to cats. "I couldn't even walk in and sit at the kitchen counter without dopping up. Now I can pet the cat, I can sit on the cat's chair, I can sit by the cat's litter box and I have no reaction at all," Campbell said. – Reported by CBS News

THE SCIENTIFIC ALTERNATIVE

Neurological Stress Reduction Therapy Allergy Testimonial III

Dear Dr Lee, Tami, Angela and the whole staff at Boca Chiropractic:

"I just wanted to thank you for helping me get my life and career back. I am happy to say I'm now cough free! When I first contacted you back in July it was Tami's kindness and compassion that prompted me to drive 40 minutes one way to try these new laser therapy allergy treatments. She gave me hope and that hope has now become a reality."

"As you know I'm a Voiceover Talent. My voice is my livelihood but with the chronic cough and phlegm I'd been experiencing for the last two years, my job was becoming more and more difficult. I was becoming very fearful that I was going to have to find another way to make a living. I had tried all kinds of allergy supplements, remedies and a few visits to the doctor that just made matters worse. It wasn't until I received my first few treatments that I began to feel some relief. It was amazing. At first I'd get relief for a day or two...then as I continued the treatments I went a whole week....and now it's been several weeks without hacking my head off. Most importantly I'm able to get through a recording session without coughing and having to clear my throat a million times. I knew I had allergies but didn't realize I was a "severe case." I had the skin scratch tests years ago, but they never helped me. When you told me the laser could actually recondition my body to eliminate the allergies I was very hopeful. There were times when I would get discouraged Dr Lee, but you always encouraged me and never gave up. You were determined to make me well and you did. I wish I could find an MD with your dedication, compassion and such a strong will to bring healing to his patients. I can't thank you enough. I have been telling lots of people about my experience and hope others will have open minds on their journey to renewed health."

Neurological Stress Reduction Therapy Chronic Skin Conditions: Eczema, Rosacea & Psoriasis

BAX 3000 Therapy for Child with Eczema Feature
Story on KTVN Channel 2 in Reno

Submitted by Bioveda Wellness Administrator on October 7, 2009 – 10:30 am

[No Comment](#)

Eczema and similar chronic skin conditions might be among the most maddening of health related conditions. To make matters worse, the incidence of eczema is on the rise. Through NSRT, we can offer symptomatic relief.

- Individuals with eczema tend to have more chronic or severe allergies
- For many, allergies bring on or worsen the condition
- The nervous system expresses or attempts to expel toxins through the skin and conditions such as eczema are no different.

Neurological Stress Reduction Therapy Chronic Skin Conditions: Shingles Testimonial

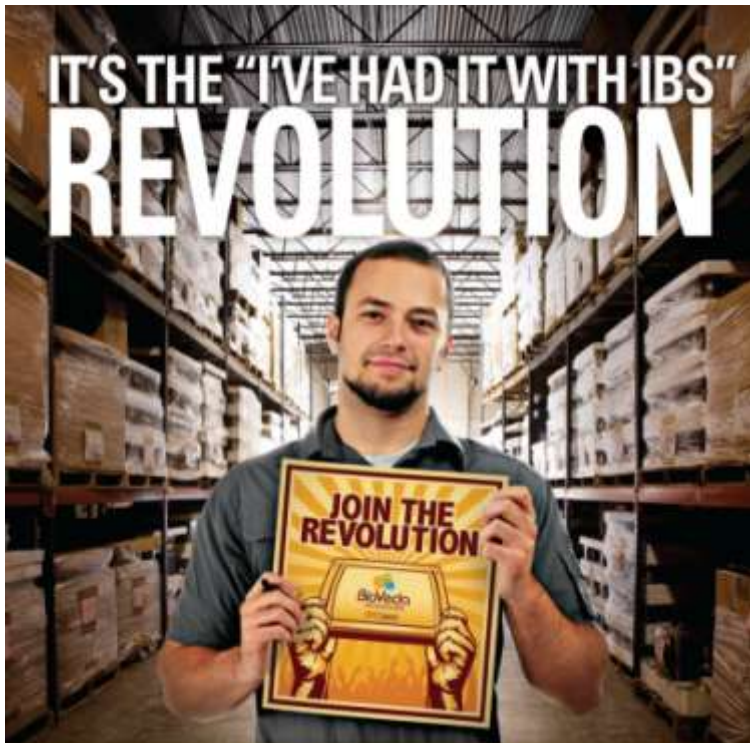

" After beginning my allergy treatments, I was diagnosed with shingles on the 8th day from onset. Luckily, I mention this to Dr. McDonald and he was able to treat me with the (bax3000) shingles virus. This morning I woke up symptom free! As I've gone through my morning, symptoms are almost non existent and not uncomfortable at all. I fully expect that with the shingles virus treatment today, the symptoms will fully disappear or at the very least I will be able to live comfortably for the rest of my life. Priceless!!! Thank you Dr. McDonald and Rhonda.

THE SCIENTIFIC ALTERNATIVE

Neurological Stress Reduction Therapy Digestion and Irritable Bowel Syndrome

In a new study at Rush University Medical Center, they found that the likelihood of Irritable Bowel Syndrome was significantly higher in patients with allergies and eczema.

Various findings suggest that allergen exposure may lead to Irritable Bowel or IBS symptoms. The research further suggests that these allergy triggers are not limited to foods! Airborne allergens also trigger IBS. Both physiological and psychological based stress are the most directly correlated causes of IBS and digestive discomfort.

Through NSRT and the reduction or elimination of physiological stress patients report significant symptomatic relief and improvement related to cramping, gas, bloating and diarrhea.

Neurological Stress Reduction Therapy

Digestion: Celiac Disease

I am a 14 yr old girl that had Celiac disease, a wheat intolerance. I wouldn't get nutrients from wheat. So I had to be on a special diet with no wheat for quite a while. Can you imagine how hard it was, no pizza, donuts, noodles, and especially bread. When I would have a bunch of gluten I would pay for it. My stomach would hurt so bad I would curl up in pain, my arms would break out in exima, and most of all I would be really grumpy and not very pleasant to be around. But then we heard about Dr. P.J Miller and this new machine, BioAllergenix that would change the frequencies in my body so I could have gluten. It is like acupuncture but more accurate and the best part with absolutely no needles. I was treated and haven't had problems with my gluten intolerance. I'm eating everything I wasn't allowed to before. This really works. If you have a severe allergy I recommend you try it. For more info go to www.BioAllergenix.com

Digestion: Colitis

Sent: Monday, December 15, 2008 4:28 PM

Subject: Thanks

Hello Dr. Starr,

I wanted to update you on the successful treatments I have been seeing since being treated by the Bax 3000 for my ulcerative Colitis symptoms. As you might recall, I have had a mild case of ulcerative Colitis for the past 29 years. Although I treat the rare flare ups with medication i have been looking for a treatment for my frequent bowel movements and constant loose stools. These on going symptoms had greatly increased in severity within the past year.

Since being treated this past Thursday December 11, I have had a very definite almost miraculous change in my symptoms. I was even able to go for a one and a hour, five mile walk today.

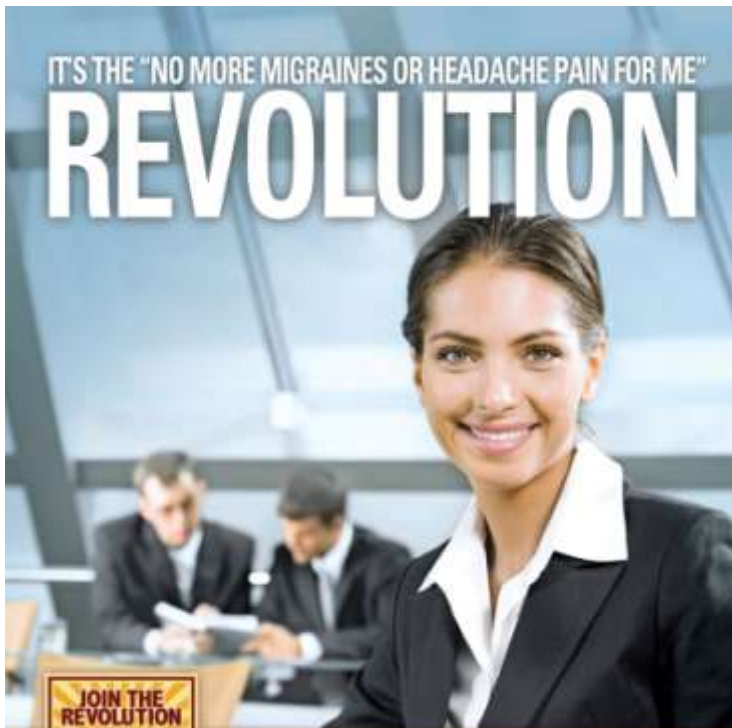

I can't thank you enough!!

Sincerely,

Kevin

THE SCIENTIFIC ALTERNATIVE

Neurological Stress Reduction Therapy Migraines and Chronic Fatigue

Migraines and Chronic Fatigue Syndrome are two of the most difficult conditions to live with and are heavily influenced by stress. CFS is related to an imbalance in the normal interactions among the various systems of the body that work together to manage stress. Migraine sufferers tend to have more sensitive nervous systems. The extreme sensitivity causes even small elevations in stress levels to trigger migraines or make them more severe.

Through positive conditioning or neurological relaxation training of the autonomic nervous system or ANS, stressful reactions that occur when exposed to specific inhalants or foods can be relieved.

Research shows that stress and food reactions are likely the first and second leading causes of migraines respectively. Because our technology and devices will reduce substance specific neurological stress, patients have reported reduction or elimination of symptoms related to these conditions.

THE SCIENTIFIC ALTERNATIVE

Neurological Stress Reduction Therapy Children's Neurological Disorders: Autism

I believe in this technology with all my heart and as a doctor that is using the system and seeing the results it blows me away every day. Last night I treated a 13 year old boy with profound autism and within minutes after I treated him I was able to have a conversation with him. His mother started to cry because she never saw this happen before. I asked the child how he felt and he said that he felt HAPPY. It was unbelievable...I believe this is a lot more than an allergy machine but a life changing machine. It has the potential to change the world and the medical profession will be turned upside down...this is the coolest thing I have ever seen in twenty years in the health care profession.

Dr. Larry Kahn

THE SCIENTIFIC ALTERNATIVE

Neurological Stress Reduction Therapy Children's Neurological Disorders: ADHD

A 5 year old boy was brought to the clinic to be tested for food dyes, additives and preservatives that could be exacerbating or causing his severe ADHD. When the child consumed artificial colors his ADHD would become uncontrollable. The ADHD was so bad a times that the child would have to be held out of school for days a time...The BAX assessment showed a number of stress responses....the child was treated for food dyes and food colors with good results but not an elimination of the ADHD condition. The child was treated for sugar which resulted in additional improvement. The mother reported the ADHD behavior began after having vaccines at the age of 2 ½ years old. I treated the child for vaccines and following the therapy, the child no longer showed any signs or behavior typical in an ADHD child. The child now comes to my clinic and is able to sit and read for 20 minutes. Prior to therapy, he never could have sat for any period of time. His teachers have commented on how calm he is and his behavior has dramatically improved. All this with no shots and no medications!

Dr. Brent Fetzer

THE SCIENTIFIC ALTERNATIVE

NSRT

Patient Assessment and Therapy

The BAX 3000 uses a combination of science that dates back decades and recent advances in technology that for the first time allow the science to be digitized, computerized and automated.

- Our Science Measures Stress on the Autonomic Nervous System
- First, A Baseline Stress Measurement is Taken of the Patient
- Second, the Baseline Measurement is Compared to the Stress Level Fluctuations the Patient Exhibits during Exposure to each Specific Substance Frequency, Identified as potential Stressors and Recorded
- As the patient, you will feel nothing and experience no discomfort during the assessment or therapy protocols
- The frequencies introduced to the body are radio frequencies and cannot produce or illicit any type of physical symptomatic response making it extremely safe for all types of patients
- The Brain and the Body's Electrical System (Neurological System) are Capable of Interpreting Various forms of Stimuli Including Frequencies

THE SCIENTIFIC ALTERNATIVE

NSRT

Patient Assessment and Therapy II

- Third, NSRT is performed using the LCM (Light Conductance Meter) which Converts the Stress Inducing Substance Frequencies to a Light Format Presented using a Laser
- The LCM or Laser Stimulates Nerve Bundles Causing the Brain to Release Endorphins & Enkephalins Calming the ANS and Conditioning the Brain to React Normally when in Contact with the Substance During Real World Exposure
- This Process is Holistic, Safe, Fast, Non-Invasive, Painless AND Highly Effective
- The Entire Library of Substances can be Scanned in Minutes
- No Other Therapy Can Offer the Degree of Assessment Specificity Down to the Molecular Level of the Component
- No Other Method of Assessment Can Scan Even a Fraction of the Substances in the BAX
- Other Methods of Assessment Would Take Years to Accomplish What the BAX can do in Minutes
- Other Treatment Options are Subjective or Painful, The BAX is Accurate and Entirely Holistic in Nature

THE SCIENTIFIC ALTERNATIVE

NSRT

Patient Frequently Asked Questions

1) Is the assessment portion of the therapy safe?

Yes. The assessment is safe for all ages including adults and children. The assessment is done using a biofeedback based process where the device emits low level radio waves and measures the bodies electrical impedance as each substance is presented. The assessment portion is no more harmful than listening to the radio. The DCM or Digital Conductance Meter is FDA Cleared.

2) How long does the assessment take?

Treatment is divided into (4) primary procedures. Each procedure has an individual assessment for the substances it contains. Procedure (1) is made up of the most common allergens and stressors. The assessment takes 8-12 minutes depending on the number of stress responses detected.

3) How long does a typical therapy session or treatment take?

Each treatment will take approximately 2-3 minutes to administer using the LCM or Light Conductance Meter.

THE SCIENTIFIC ALTERNATIVE

NSRT

Patient Frequently Asked Questions

4) How many treatment sessions will I need?

Treatment is based on the severity of each patient's condition and general state of wellness. Patients will typically fall within a mild, moderate or severe protocol however the substances requiring treatment are unique to each patient.

Mild Protocol: Typically Requires 7-10 patient visits

Moderate Protocol: Typically Requires 10-15 patient visits

Severe Protocol: Typically Requires 15-25 patient visits

5) How long with the results last after I complete treatment?

Results to date are termed indefinite. Patients and Doctors report elimination of symptoms without recurrence in most cases. Because allergies or sensitivities can develop in adulthood, elimination or alleviation of a symptom does not mean other symptoms may not present over time. We recommend an annual system balance for wellness maintenance.

THE SCIENTIFIC ALTERNATIVE

NSRT

Patient Frequently Asked Questions

6) **Is this therapy covered by insurance?**

Currently, this form of therapy falls under the realm of alternative and holistic medicine which is not covered by traditional insurance companies. We do however offer patient financing to ease any financial considerations or concerns.

7) **When should I notice symptomatic improvement?**

Results will vary from patient to patient and based on the patients general state of health. With that said, many patients experience some symptomatic relief after as few as 1-2 treatment sessions.

8) **How much does this treatment cost?**

The cost for treatment is determined on a case by case basis following the assessment of procedure (1) and patient consultation. For the purposes of setting an expectation, patients requiring severe protocol will spend between \$1,250 - \$1,500 for an entire course of therapy. Most patients will be eligible for financing and a 12 month same as cash payment plan resulting in payments of about \$100/mo.

Our goal is to make you well and we will provide care until we clear your symptoms.

THE SCIENTIFIC ALTERNATIVE

NSRT

Patient Frequently Asked Questions

9) Are there any side effects?

There are no side effects such as those typically associated with prescription and OTC medications. Some patients will experience some minor swelling, flushing or congestion following therapy but this does not typically last longer than a few hours. This is actually the body's method of detoxification and is considered a positive sign of the treatment working. This therapy is non-invasive, painless and safe. The therapy uses nothing more than sound and light.

10) How many substances can be assessed?

The library includes digital frequencies for nearly 100,000 known substances. Most of these substances are not allergens and cannot cause an allergic reaction. Our technology will assess not only common substances but phenolics or the molecular components that give our food its aroma, color, taste and texture. We can tell you if a hormone or enzyme found in more than a single type of food substance is triggering a symptom or condition. No other treatment option can test and treat with the same degree of specificity.

THE SCIENTIFIC ALTERNATIVE

BioVeda Financing

Powered by MedChoice Financial 

We are pleased to provide all of our patients with the ability to finance BAX Therapy. As a patient we can offer you the following help ease any financial concerns you may have and commit to therapy without putting you under a financial burden. Our goal is to get you well and keep you healthy, something you can't put a price on.

- 1) Financing is Same As Cash for 12 Months allowing you to have small monthly payments and no up front fee.
- 2) Patients with fair or average credit scores will be approved for more than enough money to cover the entire treatment.
- 3) Credit approval takes less than 5 minutes and can be achieved online instantly.
